

2. Write a C program to print the address in multiple lines (new lines).

```
#include <stdio.h>;
```

```
int main () {
```

```
    printf ("hig a-214 Ashiyama Colony21");
```

```
    printf ("Tagore Enclave/n");
```

```
    printf ("Moradabad/n");
```

```
    return 0;
```

```
}
```

main.c

```
1 #include<stdio.h>
2 int main() {
3     printf("hig a 214 tagore enclave\n");
4     printf("ashiyana phase 1\n");
5     printf("moradabad\n");
6     return 0;
7 }
```

Share

Run

Output

Clear

```
hig a 214 tagore enclave
ashiyana phase 1
moradabad
```
